String Keyring

Some heavy string and a hook can make a cool keyring.

Try our easy steps here or do your own design.

It's up to you!

Tools:
Scissors

Materials:
Heavy string
Hook

Steps:

String.

Cut at least an arm's length of string. Fold in thirds and attach to the hook so that one side is twice as long as the other.

Knot.

Keep the shorter line straight. With the string, make a "4" – the line down will be the shorter end. Take the end of the longer one and go under the short one and up through the hole in the four. Pull it tight.

Continue.

Continue the simple knot to the desired length. Knot the two ends together so they don't come unravelled.

Cut.

Cut ends to make them even.
