PHOTO SCAVENGER HUNT SHAPE HUNTS

Shape hunts reinforce the shape in young minds while allowing older participants the ability to examine the area more closely for the shapes they want. Shape hunts work for a variety of ages and experience levels.

Quantity Shape Hunt

Choose a single shape and the team with the most shots of the shape wins. Set a definite time limit. To determine the winners, you merely need to count the shots.

Shape in the Design

Look at art, buildings and other items to find shapes within the designs. Single shapes earn a lower point value than an element that has more than one shape. You might also want to give extra points for less obvious shapes that are found in more complicated designs.

Single Shapes

Choose a shape and find how many examples you see in nature and man-made items. Some of the shapes might include:

- Circles
- Ovals
- Squares
- Rectangles
- Triangles
- Octagons
- Stars
