## Blank Signs: Inner Frame

Blank signs have both a background and an inner frame.

The inner frame is designed as a large blank area for putting information on a sign.

To keep this simple, only the colors, backgrounds, and inner frames will initially be released.

At a later date, overlays will be introduced.

---

Basically, assembly of the blank signs will be as follows:

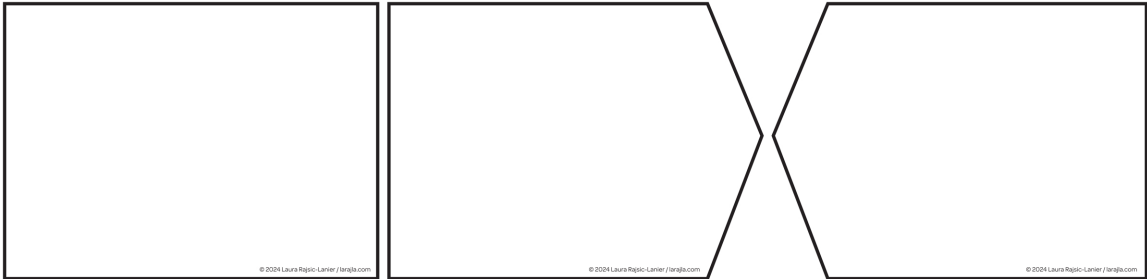

- Overlay (top layer)
- inner frame (middle layer)
- Background (bottom layer)

Colors will be added to each layer.

On initial release, there are 60 colors, 10 inner frames, and over 900 backgrounds. As such, only overviews and contact sheets will be released. By doing it this way, I can create those that are requested without making thousands of files that may or may not be used.
