Finger Puppets I

Finger puppets are unique because fingers are used for legs and other movable parts. Once made, the puppets can continue to be used.

The second page of the PDF has a couple samples to try. Feel free to create your own finger puppets.

TOOLS:

Scissors
Pencil
Templates

MATERIALS:

Markers, crayons, etc.
Magazine, chipboard or heavy cardstock
Glue

STEPS:

1. Print the templates on the next page or create your own puppet from a magazine page glued to a piece of chipboard.

2. If your puppet doesn't already have holes defined for fingers, use a penny or dime to draw around and cut out. The finger holes should be placed where it is logical to have movement like arms, legs and trunks (elephants).

3. Decorate / color the puppet as desired.
