Geometric Paper Mosaics: Six-Sided Shape

This mosaic tile is a 6-sided shape.

The individual tile sheets is 30-up on a sheet.

You can cut them by hand or cut strips and then use a 1-inch paper punch.

If you're using the tiles for building a mosaic that will be glued down to the grid, place all the tiles and make sure the design is what you want. When you're happy, glue the tiles.

You may also choose to print the tiles on card stock so you can use it more than once as more of a reusable activity.
